Rocket software

Boosting Data Governance

With **Rocket® Data Intelligence**

GROUPE PASTEUR MUTUALITÉ

The Client:

Groupe Pasteur Mutualité (GPM) supports medical professionals with tailored insurance, ensuring they can focus on patient care without added complexity.

> " With **Rocket® Data Intelligence**, we strengthen our regulatory compliance and reduce the management costs inherent in poor data quality."
>
> **Anas Taud**, Chief Enterprise Architect and Chief Data Officer, **Groupe Pasteur Mutualité**

CHALLENGE

Incomplete Data, Costly Decisions

GPM needed **full data transparency** to meet evolving EU regulations. Without a way to map and manage their data, compliance risks and operational inefficiencies grew.

- **Data lineage was incomplete**
  New EU standards required full data transparency.

- **Silos created confusion**
  Business and IT teams lacked a shared, reliable data source.

- **Expertise was slipping away**
  Legacy system knowledge was tied to retiring employees.

SOLUTION

Rocket® Data Intelligence Brought Clarity to Complexity

01 Quick Setup and Broad Compatibility
Seamlessly integrated GPM's diverse tech stack, bridging COBOL and AS400 with SQL and Oracle®.

02 Full Data Visibility
Established an end-to-end data lineage for reliable governance.

03 Scalable Data Framework
Built and refined a dynamic metamodel, keeping pace with evolving business needs.

04 Knowledge Retention
Centralized expertise, reducing reliance on individual employees.

RESULTS

Data Governance that Sees Everything

Regulatory Confidence:
Achieved full data traceability across all processes.

Lower Governance Costs:
Reduced time, effort, and resources spent managing data governance.

Enterprise-Wide Data Access :
Empowered teams with accurate, actionable insights.
